We personally have family who are *Opioid Recovery Success Stories*. They found their strength and empowerment through our Personal Training Program and sharing their love for health and wellness with others.

Our experience with holding the hand of loved ones at their lowest of lows and then celebrating with them after their phenomenal transformation, has inspired this scholarship program.

We vow to offer a “vehicle” and a support system to those who need and/or want the opportunity to not only change and save their own life through health, wellness, and fitness, but to assist them in getting into the Fitness Industry so they can do the same for others.

JOB PLACEMENT ASSISTANCE

Each State Territory has a representative that is connected to gyms across the entire state. They have the pulse of the industry in that specific geographical location and know when jobs become available. Through those connections it is our goal and objective to make sure that each one of our students is put in contact with someone for an interview in their area of expertise.

The National Personal Training Institute's CPT program is designed to give all of our alumni an advantage in this industry. The knowledge insight, business savvy mindset, opportunities for application in the real-world continuing education, and network will make you stand out in an industry that is hungry for our graduates. But just to make sure, we have a Gym Partnership program that breaks the ice for you. Let us make the relationships and sell the advantage so you are no longer hunting for jobs but are the hunted.
